

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## WS Sequel Growth Target Return Strategy Fund Retail Class

ISIN: GB00BDDRR691, a sub fund of WS Sequel Investment Funds ICVC II (the "Company"). Waystone Management (UK) Limited is the Authorised Corporate Director of the Company.

### Objectives and investment policy

Objective:

The investment objective of the Fund is to provide capital growth (net of fees) over any 5-year rolling cycle of 5% per annum over the return that could be expected from long term cash deposits, represented by the Bank of England 1 Year Fixed Rate Bond IUMWTFA.

Capital in the Fund is at risk and there is no guarantee that the investment objective will be achieved over this or any other time period.

Investment policy:

The Fund has discretion in its choice of investments. It invests predominantly in a broad range of UK and international assets. These will include company shares and bonds issued by governments and companies. Bonds are investments similar to loans which pay interest over a period of time. It will also invest in cash or deposit type investments and has the flexibility to invest in funds which, in turn, invest in alternative assets such as commodities (which are physical materials such as oil, food, and metals).

The Fund adopts an investment approach which aims to achieve capital growth. This means it will invest more in growth assets such as shares and less in lower risk assets such as bonds or cash than would be the case for a fund which aims for income, or which adopts a more cautious stance. The proportions invested in the various assets will therefore be consistent with the Fund's growth investment stance and will vary depending on the Investment Manager view of market conditions. The Fund will invest in these assets through other funds, although it may invest directly as it grows in size.

The Fund may use derivatives for efficient portfolio management (i.e. to generate additional capital or income, to reduce risk and to protect the value of the Fund).

For full investment objectives and policy information please refer to the prospectus.

Target Benchmark:

Bank of England 1 Year Fixed Rate Bond IUMWTFA + 5%

Other information:

Any income the Fund generates in respect of your investment is rolled up and included in the value of your shares.

You can buy or sell shares in the Fund at 12 noon on any business day in the UK if you tell us before 12 noon that you want to do so.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

The Fund is classified in the level 5 risk category. This is due to the historical price movement of such investments. The lowest risk category does not mean that your investment will be risk free.

The indicator uses a standard calculation method that is used by all EU management companies who offer such funds to allow you to compare funds.

The value of investments is subject to market fluctuations. Your original investment is not guaranteed and you may not get back the full amount invested in the Fund.

Although the Fund also aims to provide capital returns over the long term of 5% above that expected from long term cash deposits, this is not guaranteed.

The following risks may not be fully captured by the indicator:

The value of investments in equities and bonds may be affected adversely by political, economic or company news as well as changes in company earnings and interest rates.

The Fund invests in fixed interest securities, there is a risk that issuers of the Bonds may not be able to repay the money they have borrowed or the interest that is due.

Where the Fund makes investments in assets that are not denominated in GBP, changes in exchange rates will affect the value of your investment. The Fund may use derivatives to reduce risk of exchange rate movement and protect the value of the fund, although this may not be achieved.

There is a risk of a loss to the Fund due to system failures, inadequate controls and human error.

Further details on risk to the Fund are set out in the Risk Factors section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.50%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	1.92%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

For more information about charges, please see the Fees and Expenses section of the Fund's prospectus, which is available at [www.waystone.com](http://www.waystone.com).

For the ongoing charge, the figure is calculated as at 31 August 2020.

Where the Company buys or sells underlying investments in response to a request for the issue or redemption of shares, it will generally incur a cost. This effect is referred to as "dilution". You may be charged a "dilution levy" to be added to the issue price or deducted from the redemption price of shares as appropriate. The dilution levy will normally be up to 0.5% if a sale or purchase has a gross value equal to or exceeding 5% of the total Fund value.

## Past performance

Source: FE fundinfo 2021

You should be aware that past performance is not a guide to future performance.

Fund launch date: 07/10/2013.

Share/unit class launch date: 07/10/2013.

Performance is calculated in GBP.
